

# Workers' Marches Against Government and Capital

Cologne – Nuremberg – Frankfurt / Main – Regensburg – Munich – Bremen

**Capitalism is weak and ruined**

**It is up to us to beat and defeat it with the workers movement!**

Workers' March in Frankfurt / Main

Workers of Daimler, BMW, VW, Continental, MAN, Deutsche Bahn and other companies, whole delegations from companies like the LSG/airport, together with the laborers from hospitals, transport companies, organizations of national minorities and especially the working, learning and fighting youth from companies, schools and in the FDJ were on the streets, in front of companies, during the warning strikes of the collective bargaining rounds, in front of the vocational schools and at the seat of the city and federal states governments.

Workers' March in Munich

- We stay, the capitalists are fired!

- 7 hours a day by law for the whole class!

- Workers' right against class right of the bourgeoisie!

- We won't pay your debts. Your national bankruptcy can be our victory.

## Fighting Together in the Revolutionary Front

There was widespread agreement with the Revolutionary Front's stance that the struggle must be fought together. Workers and laborers, of metal, electric or chemical companies, together with hospital employees, those at the airport together with the tram drivers. Young and old, no matter which passport, no matter if temporary worker or permanently employed. The workers' marches have shown: In a common struggle, when we own the street, our slogans, our workers' songs sound, then the class is formed and gains its strength.

Workers' March in Bremen

The most combatant among us know that with the unions, further subjugation to capital and government is cemented. The mass dismissals are not fought with social plans and socially acceptable works councils! In the collective bargaining rounds in the hospitals, the Post or in local transport that are currently taking place, it can no longer be a matter of just a few percent higher wages.

The capitalists' general attack destroys what generations of workers have built up. A majority feels that without struggle it will be a defeat if exploitation and oppression remain. We need our fight organization, the Revolutionary Front, to mobilize the working class across the country to fight against government and capital.

against the state emergency decree of permanent availability**

## The workers stay – the capitalists are fired

If in the bargaining rounds the slogan is now issued, „Our work is of greater value,“ we say, „Our work creates all values,“ because it is we, the workers, who have built the factories and machines, who operate them, who produce.

Capitalism has no future. It is so ruined that in these days alone it throws hundreds of thousands onto the streets because it is no longer able to sustain capitalist exploitation, the only source of its existence.

Capitalism is weak and it is up to us to finally take it off the drip. Or – as one worker from Regensburg said during the protests against the thousands of layoffs at Continental: „If you want to prevent mass layoffs with a motorcade and a human chain, it’s like protecting yourself from a downpour with a newspaper. But we do not want to protect ourselves from the rain!“

Some workers at MAN (the MAN capital has announced 9500 layoffs) see it the same way after a protest rally of the IG Metall: „Yesterday we spoke militantly and today we go back to work. What we should have done today is go on strike“. – „Empty talk, I expected more“ – „Actually we should have been on strike for at least a week now to apply pressure“ – „Millions striking on the streets instead of millions for those up there“, they tell us in Nuremberg.

Trade Union Center Frankfurt / Main

In Frankfurt / Main, about one hundred employees of Lufthansa Service Company join the workers' march in front of the trade union centre to protest at verdi (trade union for service workers) against their infamous collective agreement, which includes wages even below the minimum hunger wage.

We will not leave the product of our work, the factories we have created, the wealth of the country created by our hands, to the profiteers, the exploiters and oppressors who draw their billions from misery, mass unemployment and the destruction of life: Down with the wage system and for a life without Capitalists.

From the speech of the Revolutionary Front in Munich:  
„The Schaeffler and Co, the capitalists, they have their state. They have their governments, their police, their army, their justice system. These are their weapons. Which they need to protect themselves from the long overdue departure from the history of mankind.“

**We have our weapons.  
Our weapons for the  
future of humanity.  
OUR ORGANIZATION.**

# **We do not pay your debts!**

## **Your national bankruptcy can be our victory!**

The fact that it has allowed the robbery of other peoples to this day is coming back to bite the German working class today. Half of Europe has been robbed to the blood. There is nothing left to be got; finished with the crumbs that fell from the table of the robbers.

Provisional seat of the city government in Cologne

**We do not pay  
your debts!  
Your national  
bankruptcy  
can be our  
victory!**

1.

Government robs the treasury empty

„Give me billions for the capital!“

That's why the whole country is now saying:  
Workers' funds in workers' hands!

Refrain:

Against government and capital  
on strike now everywhere!

The capital destroys the world

We will build it up when it belongs to us!

2.

The whole state, it goes bankrupt

For VW, Daimler and their scrap

We take the billions

You pay your debts!

3.

Your bankruptcy is our victory

Worker power instead of your war

If we stand together now

And move forward as a class!

**Song of the workers' march against government and capital**  
After „Song of the Five Year Plan“.

It is German imperialism that is now stripping its own people to the shirt. Which is destroying the factories and driving hundreds of thousands into unemployment, while at the same time robbing billions upon billions from the state budget and social security funds and handing them over directly to the monopolies.

Hundreds of billions for a handful of billionaires – there can be nothing left for the people who lose their jobs; nothing for the education of children, nothing for health care, infrastructure, science and culture; nothing for a life in dignity.

## Free transportation for all working people and youth instead of free military transport for murder

Demonstration through Frankfurt main station

## No transport for the warmongering – The rail tracks free for workers and youth!

A society that plunders the people to survive, that plunges millions of workers into unemployment and misery, that maintains exploitation and oppression of its capitalist system that requires the expropriator to be expropriated by a working class that takes the future of the country into its own hands, in the establishment of workers' power that puts the property of the people in the hands of the builders through the socialist society.

## The billions into the social funds – workers' funds in workers' hands!

A life of the working class and laborers makes the struggle in the Revolutionary Front, to strike to overthrow the government of the usurer state, confiscate the billions and expropriate the billionaires, a first duty.
